Warriors [3] - 40pts	Qua 4+ Def 5+	3x Spears (A1, Counter)	Highborn

Special Rules

AP: Targets get -X to Defense rolls when blocking hits.

Bounding: When this unit is activated, you may place all models with this rule in it anywhere fully within D3+1" of their position.

Counter: Strikes first with this weapon when charged, and the charging unit gets -1 total Impact rolls per model with Counter.

Crack: On unmodified results of 6 to hit, those hits get AP(+2).

Hero: Friendly units within 12” may take morale tests using the hero’s Quality, as long as the hero isn’t Shaken.

Highborn: Moves +2" when using Advance, and +2” when using Rush/Charge.

Impact: Roll X dice when attacking after charging, unless fatigued. For each 2+ the target takes one hit.

Indirect: Gets -1 to hit rolls when shooting after moving. May target enemies that are not in line of sight as if in line of sight, and ignores cover from sight obstructions.

Piercing Tag(X): Once per game, during this model's activation, pick one enemy unit within 24" and in line of sight of it, and place X markers on it. When attacking, friendly units may remove markers from their target before rolling to block to get +AP(Y) on their weapons, where Y is the number of removed markers.

Scout: May be set aside before deployment. After all other units are deployed, may be deployed anywhere fully within 12” of their deployment zone. Players alternate in placing Scout units, starting with the player that activates next.

Sergeant: When this model attacks, unmodified results of 6 to hit deal 1 extra hit (only the original hit counts as a 6 for special rules).

Shielded: Units where all models have this rule get +1 to defense rolls against hits that are not from spells.

Shielded Aura: This model and up to 3 friendly units picked before the start of the game get Shielded. If this model is killed, picked models that are deployed lose the rule.

Stealth: When units where all models have this rule are shot from over 9" away, enemy units get -1 to hit rolls.

Tough: This model only rolls to check wound effects once it has taken at least X wounds, and is only Knocked Out on rolls of 5+X or more.

Vanguard: After this model is deployed, it may be placed anywhere fully within 9” of its position.

Campaign Traits

Suppressor: Enemies that are shot at by the hero get -1 to hit when shooting until the end of the round.
